**Subject:** Microsoft Settlement

It is time to put this behind us, the citizens do not need government prosecuting companies because a few competitors feel they are unable to compete in the marketplace. Most of the states still pushing for a court date are doing so because they have a vested interest in one of the competitors of Microsoft. I as a consumer feel Microsoft has offered to me the products I want and need, at a competitive price. I would like to see my tax dollars at work helping to rebuild the economy, not trying to tear down a strong part of the economy. Enough is enough, please settle this now so we can move on !
